COVARIS E220EVOLUTION FOCUSED-ULTRASONICATOR

**Location:** CSB Level 11
Standardises sample preparation for various applications including: DNA shearing for next-generation sequencing, RNA and protein extraction, chromatin shearing, cell lysis, tissue to biomarker, compound management, formulations, and more.

- May be programmed to process 1 to 96 samples in a single batch.
- Does not require sound-proofing or other special precautions.
- Easily configured for use with all AFA Tubes (volumes from 50μl to 10ml) including single AFA microTUBE™ and the AFA 96 microTUBE Plate, for both single and batch sample processing.
